

Maloney, Seth

Short Pitch

Managed Service Provider (MSP) and IT for Small Business in the Okemos Area.

Long Pitch Many small businesses have no set Information Technology plan in place. They either decide to have themselves handle the technology or rely on family members to handle the technology. However, what happens when they are too busy making sure the business is running, or if their family members are busy? Most small businesses do not have the money to keep a full time IT staff on site, and most do not know who to contact if something breaks down. That's where Maloney IT Consulting comes in, we are an MSP focused on providing IT for small businesses.

Testimonials (Personas) These are fake names and Businesses

Matthew Reed Owner of Willow & Pine Crafts- 35 years old. "Seth was beyond helpful in responding when our WiFi went down. He responded quickly, and was able to get it up quickly with minimal impact on our business. He explained everything to us that he was doing, and was understanding even when I was stressed. We would have been in trouble had we not been in business with Maloney's IT Consulting."

Elena Harper, Owner of Sunny Side Bakes- 40 Years old

"Seth is a life saver, I know my way around an oven, but anything technology is another language to me. Seth was able to come in, and explain everything in my shop, and what it does. That way if something ever breaks, I can troubleshoot it myself! The other IT Consulting businesses around here would have laughed me off if I asked them to explain anything, but not Seth! I wholeheartedly suggest Seth for your IT needs!"

Mike Davis, Owner of Blouse Barn-50 years old

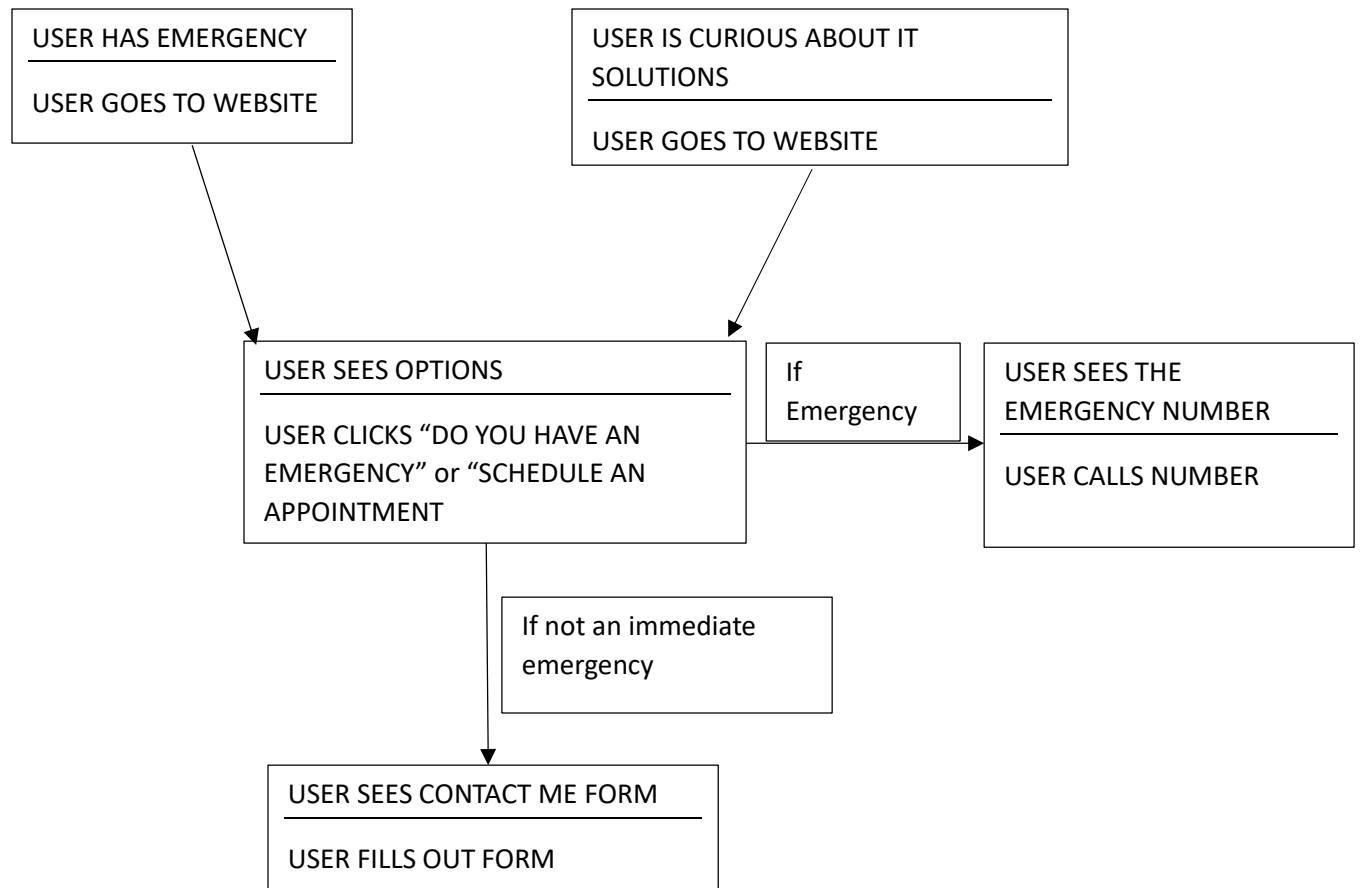

"I don't know where I would be without Seth. No one thinks about IT until something breaks, and when something breaks, it is always at the worst time! I was waiting on a very important call with investors from Australia, when all of a sudden, my computer died! I called the other big IT Consulting places around here, and they all gave me three hour windows, I tried to explain that I needed help now, but all they said was it was an extra fee! I called Seth expecting to get the same answer, but instead, he said he was on his way over! No extra fees, no window of time for him to show up. I wasn't even a customer of his when I called, and he still came right over. You bet I'm a customer of his now!"

Comparative Websites Note that since most of the competitive business are also very small businesses, they will not have any official websites.

Spartan Technology Consulting. Small business only has four workers working for them. Appears to be out of a house. <https://www.buzzfile.com/business/Spartan-Technology-Consulting-LLC-517-432-4396>

Fizer Solutions. No official write up, just a phone number. Appears to be out of a house. https://www.dnb.com/business-directory/companyprofiles.fizer_solutions_llc.b66dc76fb871f4bf4ef64e410221112a.html

 Allow me to Introduce Myself

Home About Contact Testimonials

I believe one of the most important things when it comes to providing good, quality service is knowing who works for you. My name is Seth Maloney, and I am a graduating student from Michigan State University (Go Green!) I have worked in Information Technology for over five years, starting when I was an intern at Delta Dental and working my way up to On-Site IT support at Greif's Mason Plant, the largest manufacturing plant that they have. I am in the National Guard, and have deployed to Syria. I'm confident I can setting up the network in Syria, that I can fix any network or computer issues that you have.

A lot of the larger IT companies in the area will give you "Consulting Options" when they want to make you pay a monthly fee for them to come out and fix your issues, but come time that something has broken, they say, "We will be out there from the time of 4-6." How does that help when your main way of checking out customers with a card is down, and you're losing money every minute that the device is down? I will give you an exact minute that I will be there, and whether the device goes down at 6AM or 11PM, I will be there with a smile on my face and I will put your issues first and foremost. The best part? You only pay me when something breaks.

I stayed in the field of Information Technology because I love to help people. I love the sigh of relief from a nervous employee who was freaking out that their computer went down right before a big presentation, and I get it up with time to spare. I love having my employers call me reliable, and know that when they need me, I will fix their IT issues. From being up in a scissor lift trying to find Wifi Access Points to troubleshooting why the printer won't print, I've seen it all. You have enough to worry about being a small business, let me worry about the technology.

Are you interested in letting me work for you? Click the link below, and let me know.
